SATURDAY, SEPTEMBER 13, 1880.

No township in Essex County of fe'rs better natural facilities for the carrying on of manufacturing than Bloomfield. Second and Third rivers, Tony Brook, the Morris Canal, and her minor streams afford and

other minor streams afford an abunlance of water. Our transportation facilities are excellent. The Dele ware, Lackawanna and Western Rail and the press teems with advertisements of sarasparillas, and other liver, blood and lung remedies, but there is one medicine, and quill one, the claims for which, as a cure for all Lake Railway, and the Frie Orange Branch emable manufacturers to ship and recovery goods from every point. One place are not afflicted with any social antipathy towards factories, which is a peculiarity of some of our neighboring towns. First class factory sites abound in every part of the started among our business men to place before the public the advantages of Bloomfield in this respect. Per-

of Bloomfield in this respect. Per-Board of Trade. If we are not we should make the nearest approposition to it. With a bureau of correspondence disseminating information and ever on the alert to get in haps we are not in a position to suption and ever on the alert to get in touch with parties on the lookout for a building site for industrial purposes several thousand dollars per annum might soon be added to the business of the town, and it would be widely in Joust distributed through every branch. Our banks would profit by it, our grocer, butcher, dry goods dealers and very other business, small or large. We throw out this suggestion advisedly: we know that there is a sentiment in favor of some movement of the kind among the business men of the town.

It only awaits some one to move in

the matter. The time is ripe for it. **** Manufactured Ice. There is one point in connection with the ice manufactured at the works of the Bloomfield and Mont clair Crystal Ice Company that is deserving the attention of every con sumer, and that is the purity of the article furnished. The several terms, (all of them misnomers) that have been applied to this ice to distinguish it-from the natural article has some what confused the public mind. The term "chemical ice" has perhaps been the most damaging of numerous at tempts to give it a name. This term has given rise to the idea that the process of manufacture is involved in mystery, and that certain obnoxious ingredients enter into the process of manufacture. This is far from the facts. The process is a simple one, as can be readily seen by anyone who will accept the Company's cordial invitation to inspect it. For the sake of those who may not be able to avail hemselves of this opportunity, the

following brief facts may prove of Varnishes, Japans, In the first place the water used is of the purest being taken from an artesian color deep. Second. ly it is subjected to a thorough filtera. tion and finally it is distilled; connequently before being introduced in Painters' Supplies. pure as it ispossible to get it. The fact that ammonia is used in the process of freezing has led people ignorant of the system of operation to believe that 580 Broad Street, and they have gone so far as to declare they could taste it. This is impossible. The ammonia has no con

sanitary and domestic purposes the manufactured ice must necessarily be

tremely limited and does not affect the general public. It is not felt to any extent in the trade and where the ice has been given a fair trial, perfice have soon learned to appreciate its superior quality. The Bloomfield superior quality.
